Summary

I am a motivated and detail-oriented graduate with a strong foundation in AWS DevOps, cloud computing, and CI/CD tools such as Docker, Jenkins, Kubernetes, Terraform, and Git. I am seeking an entry-level position to apply my technical skills and problem-solving abilities while contributing to impactful projects and the growth of an organization.

Skills

ansible • Apache • Apache Tomcat • Auto Scaling • AWS • AWS EC2 • AWS Services • CI/CD • Cloud Computing • Cloudwatch • Continuous Integration • devops • Docker • EC2 • Git • Github • IAM • Jenkins • Kubernetes • Linux • load balancer • Maven • Nexus • Nginx • Performance Monitoring • RDS • s3 • shell scripting • Terraform • Tomcat • Ubuntu • VPC • Web Hosting • Windows • SQL Basics • python Basics

Projects

Website Hosting Using CI/CD

<https://github.com/saikumar0503/java-web-application.git>

Website Hosting Using CI/CD

- Automated and streamlined the deployment of a web application using Jenkins, Maven, Tomcat, and AWS, ensuring efficient CI/CD processes and scalable infrastructure management.
- Configured Jenkins pipelines to automate builds, testing, and deployments.
- Used Maven for managing dependencies and generating deployable artifacts.
- Deployed applications on Apache Tomcat servers for reliable hosting.
- Provisioned EC2 instances and implemented performance monitoring with AWS CloudWatch.
- Managed source code and collaboration using Git and GitHub.

Infrastructure As a Tool (IaC) Project:

https://github.com/saikumar0503/Terraform_project.git

Project Title: AWS Infrastructure Deployment Using Terraform

- Objective:** Successfully provisioned and managed AWS infrastructure using Terraform to automate the deployment of EC2 instances, VPC, Security Groups, and S3 Buckets, ensuring scalability and consistency.
- Key Contributions:**
 - Defined Terraform configurations for efficient infrastructure provisioning.
 - Utilized Terraform modules to streamline deployment processes.
 - Managed Terraform state files effectively to ensure resource consistency.
 - Implemented remote backend storage using S3 and DynamoDB for state management.
 - Applied best practices for secure IAM role assignments to Terraform-managed resources.
- Successfully completed the AWS Infrastructure Deployment project using Terraform, ensuring efficient and automated cloud resource provisioning.

Experience & Training

Smart IT Solution

Aws Devops Engineer

AWS DevOps Training - Smart IT Solutions

- Gained practical experience in AWS services, CI/CD pipelines, and DevOps tools.
- Configured Jenkins, Docker, Kubernetes, and Terraform for automated deployments.
- Implemented infrastructure as code (IaC) using Terraform to provision AWS resources.
- Worked on AWS EC2, S3, IAM, VPC, RDS, and CloudWatch to manage cloud environments.
- Developed and deployed a web application and Infrastructure as a code as part of the final project.
- Successfully completed the Website Hosting project using CI/CD, ensuring efficient automation and scalable deployment of web applications and implementation of Infrastructure as a code tool terraform .

Education

Sree Vahini Institute Of Science And Technology

Bachelor of Technology (B.Tech)

2021 - 2024

AIMS College Of Engineering

Diploma

2018 - 2021

Z.P.H School Peddadimili

SSC

2017 - 2018

Key Achievements

- 

Improved Deployment Efficiency

Automated deployments reduced downtime by 30%.
- 

Cloud Infrastructure Management

Managed 10+ EC2 instances with zero incidents.
- 

Enhanced Release Process

Implemented CI/CD pipelines increased release confidence by 40%.
- 

AWS Knowledge Sharing

Trained 5 colleagues in AWS services usage.

Strengths

- 

Strength

Excellent Writing and Communication Skills
- 

Strength

Strong team player with a positive attitude toward collaboration and problem-solving

Interests

- 

Hobby

Swimming

Hyderabad
