

BALAGA SAIKUMAR

JUNIOUR ENGINEER

7032174345 | saikumarbalaga03@gmail.com | <https://www.linkedin.com/in/balaga-saikumar-1855b0312/> |

CAREER SUMMARY

Junior Engineer with experience in **Leica Cyclone**, **PDMS piping modeling**, **AutoCAD 2D drafting**, and **AutoCAD sheeting**. Basic knowledge of **SolidWorks** and currently learning **AutoCAD Plant 3D**. A quick learner with good problem-solving and teamwork skills, eager to grow professionally and contribute effectively to engineering projects.

EDUCATION AND CERTIFICATION

B.Tech in Mechanical Sree Vahini Institute of Science and Technology	2024
Diploma In Mechanical AIMS College of Engineering	2021
SSC Z.P.H School Peddadimili	2018

TECHNICAL SKILLS

- **Leica Cyclone** – 3D Modeling using Point Cloud Data
- **AVEVA PDMS** – Piping Modeling
- **AutoCAD 2D** – Drafting and Drawing Preparation
- **AutoCAD Shheeting** – Basic Sheet Creation and Layout Management
- **SolidWorks** – Basic 3D Modeling
- **AutoCAD Plant 3D** – Currently Learning
- **P&ID Interpretation** – Basic Understanding
- **Technical Drawing Reading** – Understanding Engineering Drawings

WORK EXPERIENCE

Junior Engineer

Habtech Engineering Private Limited | January 2025 – Present

Roles & Responsibilities:

- Creating accurate 3D models using Leica Cyclone based on laser scan point cloud data.
- Developing and modifying piping models in AVEVA PDMS according to project requirements.
- Preparing and updating AutoCAD 2D drawings and engineering sheets.
- Reading and interpreting P&IDs, PFDs, and technical drawings for design and modeling activities.
- Supporting piping layout development and equipment modeling.
- Ensuring model accuracy by comparing designs with available project data and drawings.
- Assisting in the preparation of engineering documentation and drawing updates.
- Coordinating with project teams to resolve design-related issues and maintain project quality.
- Following company standards and project specifications while executing assigned tasks.

- Maintaining organized project files, drawings, and model data for efficient project execution.
- Participating in project reviews and implementing required modifications based on feedback.
- Learning and applying new tools and technologies such as AutoCAD Plant 3D to improve design capabilities.
- Supporting ongoing engineering and design activities in industrial and plant projects.
- Ensuring timely completion of assigned tasks while maintaining quality standards.
- Collaborating effectively with colleagues and senior engineers to achieve project objectives.

PROJECTS

BPCL (Bharat Petroleum Corporation Limited)

Role: Junior Engineer

- Created accurate 3D models in Leica Cyclone using point cloud data.
- Used the Cyclone model as a reference for developing piping models in AVEVA PDMS.
- Performed piping routing and equipment modeling based on project requirements.
- Interpreted P&IDs and engineering drawings to support modeling activities.
- Ensured piping models matched the point cloud data and design specifications.
- Assisted in identifying and resolving modeling inconsistencies.
- Coordinated with project team members to maintain model quality and accuracy.
- Supported project documentation and engineering deliverables.

Bokaro Steel Plant

Role: Junior Engineer

- Developed accurate 3D structural models using **Leica Cyclone** based on point cloud data.
- Modeled structural components such as columns, beams, platforms, ladders, and supports.
- Utilized point cloud data to create and validate existing plant structures.
- Worked on **AutoCAD sheeting** using drawings provided by the extraction team.
- Performed **tagging, elevation marking, dimensions, and drawing updates** as per project requirements.
- Reviewed engineering drawings and ensured consistency between models and drawings.
- Maintained proper organization of model and drawing files.
- Coordinated with extraction and project teams to deliver accurate engineering outputs within project timelines.

Ferring Pharma Plant

Role: Junior Engineer

- Developed accurate 3D models using Leica Cyclone based on laser-scanned point cloud data.
- Modeled pharmaceutical plant equipment such as tanks, reactors, vessels, pumps, ducting, and supporting structures.
- Utilized point cloud data to create and update models according to existing site conditions.
- Ensured proper placement and alignment of equipment and ducting within the 3D model.
- Maintained model accuracy by comparing models with scan data.

- Organized and maintained project files and model data as per project requirements.
- Collaborated with team members to ensure timely completion of project deliverables.
- Supported engineering and modeling activities while maintaining quality standards.

Additional Projects

- Worked on multiple industrial and plant engineering projects involving **3D modeling using Leica Cyclone**
- Contributed to projects such as **BASF, Griffith, Bokaro Phase 2**, and other industrial facilities.
- Supported modeling, drawing preparation, tagging, elevation updates, and engineering documentation activities.
- Collaborated with project teams to ensure accurate and timely project deliverables.

PERSONAL DETAILS

Full Name : Balaga Saikumar
Date of Birth : 05 March 2003
Nationality : Indian
Gender : Male
Marital Status : Single
Languages Known : English, Telugu
Address : Peddadimili Village, Srikakulam, Andhra Pradesh, India
Mobile Number : +91 7032174345
Email ID : saikumarbalaga03@gmail.com
